

If these populations...

Low-income Latino and African American children and youth on the South and West sides of Chicago

...attend programs with these elements...

Deliver research-based educational programs with linguistic and cultural competency *and a racial equity lens*

Provide mental health services that address obstacles to learning and increase resilience

Incorporate parent engagement to increase parental capacity to support their children and family needs

Build social consciousness and provide civic engagement opportunities for our families as tools to overcome economic barriers

...they will achieve these outcomes

Short-term outcomes (*accountable*)

	Academic		Social and Emotional		Civic Engagement
Early Childhood (age 0-5)	Children meeting early childhood education benchmarks	+	Develop a foundation for resilience and Mental health awareness	+	Demonstrate social consciousness
Youth (age 5-18)	Students at or above grade level	+	Build/Strengthen emotional intelligence and develop mental wellness capacity	+	Increased social consciousness and engagement in community
Parent Engagement	Increased confidence in ability to support child's academic development	+	Increase in their SE capacity to be able to implement practices and support the mental health needs of their children	+	Demonstrate capacity to advocate for their children and their communities

Long-Term (*measurable?*)

Children graduate high school and are able to...

- Think critically to solve problems and make ethical decisions
- Engage civically in community and collaborate with others
- Draw on robust coping mechanisms to ensure mental wellbeing

Ultimate Outcome

Children have the skills and resilience to succeed in school and achieve their full potential.
